Thanks for the quick response Tim. I didn't know he released the article. Do you know when it came out? Please let me know if you have any info on EPA/NY State historical communication that Telvock referenced. Thanks for the update on 789 UMR.

Eric,

Thanks for the update.

Yes, we saw Mr. Telvock's latest article.

Scheduling with the land owner of 789 UMR has been problematic. Outdoor work has been postponed until the spring.

DOH was still looking at possibly testing for Radon indoors if scheduling could be worked out, but I have not heard back on that. Have asked for an update from regional staff in DEC and DOH.

Good Morning:

I wanted to touch base with you regarding Niagara Falls Boulevard Site. The last PolRep sent out at the end of January is attached. I will eventually send out an update but like to reach out to the state sometimes individually in between PolReps. We are currently finished the excavation and T&D for the winter. We awarded the construction contract and actually poured the concrete flooring in the GNBC Office Area on February 3rd. Last week we had EPA training which was good timing while the concrete cured. I am back on-site for today to oversee the GNBC Office rebuild.

EPA was interviewed again by Dan Telvock. Mostly, it was a follow up with our health physicist for technical questions. He did inquire about responsible parties and work on the other potential radiological sites in Niagara County. I informed him that the standard process barring an emergency response is a referral from NY State. I once again told him I cannot speak on the past and specifically how the state activates their removal program. He did mention that the state contacted EPA years ago about working on these sites but did not provide specifics on when this occurred, who from the state spoke to who and what program in EPA. Years ago meaning before my time and before we were given the referrals in 2013. If you know this information, please provide me some specifics. It would be good for me to have that knowledge and check into it on my end.

Lastly, is there any update on the assessment being conducted at 789 Upper Mountain Road? I get asked this periodically but have received no information to pass on.

I hope all is well.

Thanks

Regards,
